

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1 - 6. (canceled).

7. (currently amended): An interlayer for a laminated glass which comprises a thermoplastic resin sheet provided with embossments comprising concave portions and convex portions on both sides thereof,

said concave portions on at least one side having a trough-like geometry with a continual bottom while said convex portion on the same side having a plateau-forming top surface,

wherein fine concave and convex portions are provided on the plateau-forming top surface of the convex portion, and

the interlayer is capable of contact bonding to a glass sheet,

wherein the thermoplastic resin sheet comprises a material selected from the group consisting of a plasticized polyvinyl acetal resin, a polyurethane resin, an ethylene-vinyl acetate resin, an ethylene-ethyl acrylate resin, and a plasticized vinyl chloride resin.

8. (canceled).

9. (previously presented): The interlayer for a laminated glass according to Claim 7,

wherein the surface roughness Ra of the plateau-forming top surface is not less than 3.0 μm .

10 - 36. (canceled).

37. (previously presented): The interlayer for a laminated glass according to Claim 7, wherein the average surface roughness of the embossment is not greater than 100 μm .

38. (previously presented): The interlayer for a laminated glass according to Claim 7, wherein the average surface roughness of the embossment is not greater than 70 μm .

39. (previously presented): The interlayer for a laminated glass according to Claim 7, wherein the width of the plateau-forming top of the convex portion of the embossment (b) is 20 to 90% of the interval (pitch) of the convex portion of the embossment (a).

40. (new): The interlayer for a laminated glass according to Claim 7, wherein the thermoplastic resin sheet comprises a plasticized polyvinyl acetal resin.
